To: Bow River Shippers

Subject: Migration of Bow River (BR) from Premium Conventional Heavy (PCH) to Conventional Heavy (CHV) Pool

Effective January 1, 2018 all Bow River injections into the Enbridge mainline will transport as the Conventional Heavy (CHV) Pool opposed to the Premium Conventional Heavy (PCH) pool. Enbridge will be sending out notice of the change shortly and will highlight the new Crude Oil Commodity Map, Reference Management document, and the handling of retention stock.

If you have any questions or concerns please contact your Gibson Energy customer representative.

Thank you,

Craig Wilford
VP Wholesale Crude Oil
