Our Hardisty Operations

Terminal Storage

Gibson's Hardisty Terminal is a 24 hour, 7 day operation with full shift operations and maintenance department employing more than 100 people locally. Our Hardisty Terminal is strategically located in the heart of the most important heavy crude oil storage hub in Canada, with approximately 14.0 million barrels of existing storage. As the largest independent storage facility at Hardisty, and with the best-in-class connectivity to inbound and outbound pipelines, our Hardisty Terminal offers the most flexibility to our customers as they transport their products to end markets. We touch one in four barrels of crude oil produced in Western Canada.

Rail and Road Connectivity

Gibson's Hardisty Terminal also has exclusive access to the Hardisty Unit Rail Facility, a Joint Venture with USD Group, which has the ability to load up to three-unit trains per day, moving approximately 210,000 barrels per day. Our customers at the terminal include supermajors, senior oil sands producers, refiners and others. With significant acreage adjacent to the existing tanks and in the surrounding area, we plan to continue growing our position at Hardisty.

Our Commitment to Our Stakeholders and Partners

At Gibson, we energize collaboration and connectivity. This means we are committed to working closely with the communities where we live and work to ensure we are a responsible corporate citizen. With nearly 70 years' experience, we aim to earn the trust of our stakeholders and communities through open and

honest communication. From our day-to-day operations to the planning and implementation of new projects, our business relies on meaningful engagement with the communities we operate, which include landowners, Indigenous Peoples, regulators, all levels of government, community investment partners and other stakeholders.
