

DRU At Hardisty

FACT SHEET

About Us

Gibson Energy (Gibson) is a Canadian-based liquids infrastructure company with its principal businesses consisting of the storage, optimization, processing, and gathering of liquids and refined products. Headquartered in Calgary, Alberta, Gibson's operations are focused around its core terminal assets located at Hardisty and Edmonton, Alberta, and include the Moose Jaw Facility and an infrastructure position in the U.S.

Innovative DRU technology and its product, DRUbit™, are a more sustainable way to deliver heavy Canadian crude from Canada to the U.S. Gulf Coast.

The First Diluent Recovery Unit in Western Canada

The Hardisty Energy Terminal (HET) launched in 2021 with our partner, USD Group. It is a high-quality infrastructure project and first of its kind in Western Canada. The DRU separates the diluent that has been added to the raw bitumen in the production process (to aid flow through the pipelines), which meets two important market needs – it returns the recovered diluent for reuse in the Alberta market, reducing delivered costs for diluent, and it creates DRUbit™, a proprietary heavy Canadian crude oil specifically designed for rail transportation and preferred by refiners.

Full Market Access Solution

From Alberta's oil sands to Port Arthur for transport across the U.S. Gulf Coast, the Hardisty Energy Terminal provide infrastructure to support egress.

Innovative, Safe & Sustainable

Since 2021, the DRU has provided a safer, non-hazardous product that offers substantially lower rail cost relative to traditional DilBit. This innovative technology is the first of its kind in Western Canada with potential to expand in the future.

- **Unit Trains** have the ability to be loaded at the DRU each day
- **210,000** barrels are moved through the DRU per day
- **50/50** The DRU is a Joint Venture between USD Group and Gibson Energy

Our Commitment to Our Stakeholders and Partners

At Gibson, we energize collaboration and connectivity. This means we are committed to working closely with the communities where we live and work to ensure we are a responsible corporate citizen. With nearly 70 years' experience, we aim to earn the trust of our stakeholders and communities through open and honest communication. From our day-to-day

operations to the planning and implementation of new projects, our business relies on meaningful engagement with the communities we operate, which include landowners, Indigenous Peoples, regulators, all levels of government, community investment partners and other stakeholders.
