

Moose Jaw Facility

FACT SHEET

About Us

Gibson Energy (Gibson) is a Canadian-based liquids infrastructure company with its principal businesses consisting of the storage, optimization, processing, and gathering of liquids and refined products. Headquartered in Calgary, Alberta, Gibson's operations are focused around its core terminal assets located at Hardisty and Edmonton, Alberta, and include the Moose Jaw Facility and an infrastructure position in the U.S.

LEGEND

- Gibson Property
- Water/River
- Highway/Road
- Buildings

Our Moose Jaw Facility in Saskatchewan is a heavy crude oil processing facility that produces a wide range of high-quality refined products.

Producing High-Quality Refined Products

Operating year-round with road, rail and pipeline connections, the facility runs a heavy crude feedstock, with the resulting light end products composed of tops, heavy distillate, light distillate and CVGO, while heavy end products include roofing flux and road asphalt.

Operating Safely

We regularly conduct a turnaround of our Moose Jaw Facility to ensure the continued safety and integrity of our operations. During the turnaround, we clean, inspect and service all the facility's equipment to ensure we are running safely and efficiently.

Continually Optimizing

As part of our efforts to expand capacity, reduce emissions and improve the efficiency of our operations, we recently completed a project at our Moose Jaw Facility to construct a natural gas liquids (NGL) plant and switch from a feedstock-based, higher emissions intensity fuel supply to natural gas, while also increasing the production capacity of the facility.

- **Connected to both road, rail and pipeline**, our Moose Jaw Facility is set up for optimal egress
- **22,000 barrels** of throughput per day at our Moose Jaw Facility
- **24/7 year-round** operations at our Moose Jaw Facility

Our Commitment to Our Stakeholders and Partners

At Gibson, we energize collaboration and connectivity. This means we are committed to working closely with the communities where we live and work to ensure we are a responsible corporate citizen. With nearly 70 years' experience, we aim to earn the trust of our stakeholders and communities through open and honest communication. From our day-to-day

operations to the planning and implementation of new projects, our business relies on meaningful engagement with the communities we operate, which include landowners, Indigenous Peoples, regulators, all levels of government, community investment partners and other stakeholders.
