SKIN

In case of contact, immediately flush eyes with running water for at least 15 minutes. Hold eye open with fingers while rinsing. If irritation persists, seek medical advice.

In case of contact, wash skin with soap and water. In case of burns, immediately cool skin for as long as possible with cold water. Do not remove clothing if adhering to skin.

HAZARD

Butane, Crude Oil, Gasoline and Diesel storage bullets, making it an area specific emergency response plan. Gibson obtains the confidential* information it may need to contact each business in the immediate area.

Although the probability of an incident is low, Gibson is taking action to ensure residents in the immediate area are aware of how to respond to a potential emergency. This Information Pamphlet is Environment Canada Regulated.

This Information Pamphlet contains information on potential health impacts, procedures for evaluation, potential actions, what to do, and Gibson Energy contacts.

Public Protection Measures

Preparation Measures

Establishing a potential emergency response plan for Gibson Energy operations is a key measure to ensure readiness in the event of an incident. This plan includes specific actions that are to be taken in the event of a potential emergency, such as evacuation, shelter-in-place, or public protection measures.

Public Protection Measures involve actions that can be taken by the public to protect themselves in the event of a potential emergency. This includes evacuation, shelter-in-place, or other measures that can be taken to ensure personal safety.

Public Protection Measures

Public Protection Measures are a key component of any emergency response plan. These measures are designed to protect the public from potential harm in the event of a potential emergency. This includes actions such as evacuation, shelter-in-place, or other measures that can be taken to ensure personal safety.

Public Protection Measures

Public Protection Measures are a key component of any emergency response plan. These measures are designed to protect the public from potential harm in the event of a potential emergency. This includes actions such as evacuation, shelter-in-place, or other measures that can be taken to ensure personal safety. In some cases, there may be concern that evacuation would expose occupants to greater hazard than if they remain in their homes. Buildings infiltrates from outdoors, thus reducing the concentrations to which the occupants are exposed. Therefore sheltering may be considered as alternative to evacuations for short durations.

If you are unable to follow these instructions, please notify Gibson representatives that you are unable to follow instructions. For major incidents, a special number may be designated to Gibson and the Alberta Energy Regulator (AER) to start any vehicles until a Gibson representative advises you that it is safe to do so.

You will also be provided with instructions to check in and register at the Gibson emergency response reception centre and check in with the representative.

Wait for further instruction.

A Gibson representative will verify your location and inform you of the situation. Special needs considerations include residents who may require transportation, assistance to a hospital or shelter, or assistance to return to your home in the event of an evacuation. Gibson representatives will assist residents in the immediate area to understand how it functions.

Once the building is completely ventilated, return all equipment to normal operation. Turn off all fans for heat recovery ventilators or energy recovery ventilators. Turn down furnace thermostats to the minimum setting, turn off air conditioning systems and fume hoods. Tightly close windows and outside doors. If convenient, tape the doors shut while ventilating.

Ventilate your building by opening all windows and doors, turning on fans for heat recovery ventilators or energy recovery ventilators. This can be contacted by Gibson emergency response personnel.

Fans for heat recovery ventilators or energy recovery ventilators can be started immediately. Gibson emergency response personnel will verify your location and inform you of the situation. Special needs considerations include residents who may require transportation, assistance to a hospital or shelter, or assistance to return to your home in the event of an evacuation. Gibson representatives will assist residents in the immediate area to understand how it functions.
