

DRU At Hardisty

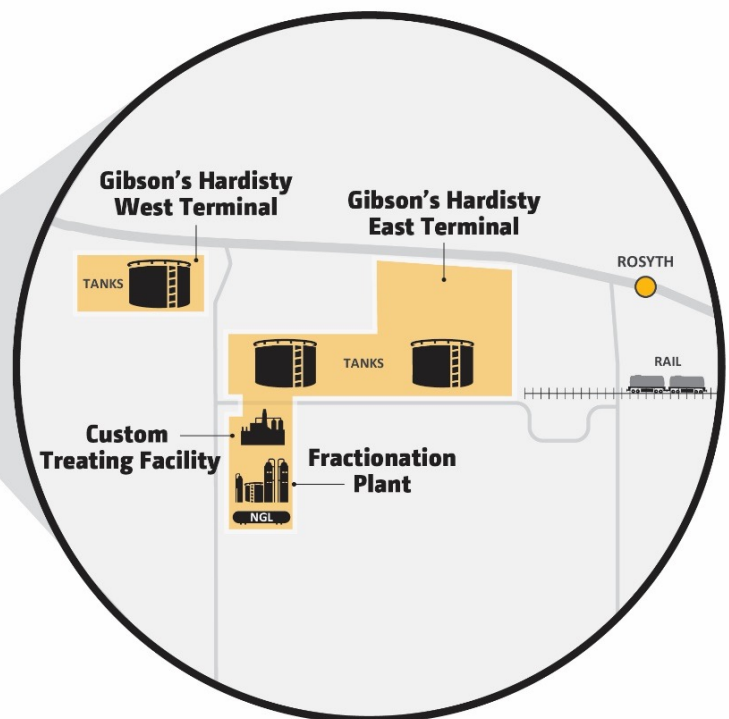

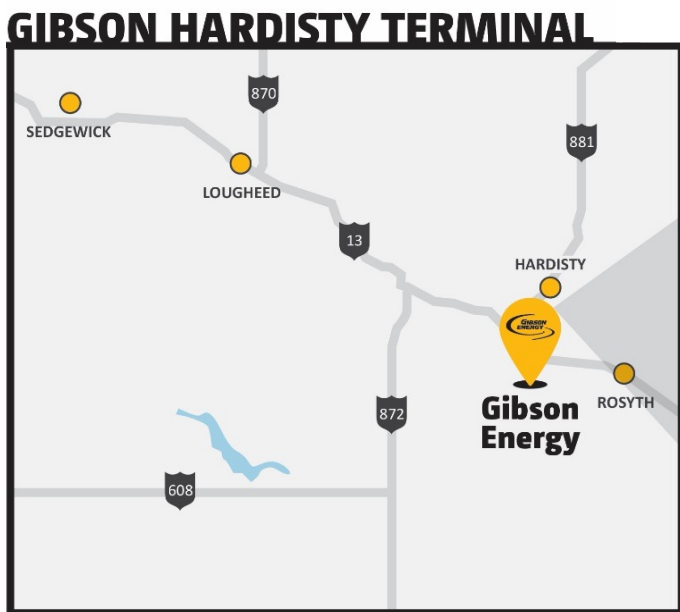

FACT SHEET

About Us

Gibson Energy (Gibson) is a North American-based liquids infrastructure company headquartered in Calgary, Alberta. With 25.2 million barrels of storage and over 500 km of crude pipelines across North America, we touch 1 in 4 WCSB barrels through GEI terminals. Utilizing this focused asset base, along with our dedicated and talented employees, we help create value for our customers while generating stable, long-term cash flow. Ultimately, our strategically located facilities, combined with our best-in-class market connectivity and a long-term growth outlook, help us connect our customers to markets, our employees to exciting and rewarding careers and investors to long-term value.

Hardisty Terminal Location

Innovative DRU technology and its product, DRUbit™, are a more sustainable way to deliver heavy Canadian crude from Canada to the U.S. Gulf Coast.

The First Diluent Recovery Unit in Western Canada

The Hardisty Energy Terminal (HET) launched in 2021 with our partner, USD Group. It is a high-quality infrastructure project and first of its kind in Western Canada. The DRU separates the diluent that has been added to the raw bitumen in the production process (to aid flow through the pipelines), which meets two important market needs – it returns the recovered diluent for reuse in the Alberta market, reducing delivered costs for diluent, and it creates DRUbit™, a proprietary heavy Canadian crude oil specifically designed for rail transportation and preferred by refiners.

Full Market Access Solution

From Alberta's oil sands to Port Arthur for transport across the U.S. Gulf Coast, the Hardisty Energy Terminal provide infrastructure to support egress.

Innovative, Safe & Sustainable

Since 2021, the DRU has provided a safer, non-hazardous product that offers substantially lower rail cost relative to traditional DilBit. This innovative technology is the first of its kind in Western Canada with potential to expand in the future.

- **Unit Trains** have the ability to be loaded at the DRU each day
- **50,000** barrels are moved through the DRU per day
- **50/50** The DRU is a Joint Venture between USD Group and Gibson Energy

Our Commitment to Our Stakeholders and Partners

At Gibson, we energize collaboration and connectivity. This means we are committed to working closely with the communities where we live and work to ensure we are a responsible corporate citizen. With over 70 years' experience, we aim to earn the trust of our stakeholders and communities through open and honest communication. From our day-to-day

operations to the planning and implementation of new projects, our business relies on meaningful engagement with the communities we operate, which include landowners, Indigenous Peoples, regulators, all levels of government, community investment partners and other stakeholders.

STAY SAFE AROUND PIPELINES Call or Click Before You Dig

If you are planning ground disturbance work near a pipeline Right-of-Way, you have an important role to play in ensuring safety. Prior to initiating any type of ground disturbance work, you are required to Call or Click Before You Dig.
